Cam Viewer 3 Professional

An excellent solution to advance surveillance needs, the PLANET Cam Viewer 3 Pro (CV3P) can manage different IP cameras at the same time in just one central management interface. Providing a state-of-the-art IP surveillance system, this software supports the most of PLANET IP cameras and video servers. With the IP devices connected directly to LAN or any TCP/IP network such as the Internet, digital recording of the IP surveillance system can be saved directly in the hard drive(s) of the PC.

Cam Viewer 3 Pro helps users to monitor and record images / videos from multiple cameras simultaneously by using a single PC and able to operate up to 4/8/16/36/64 channels according to the software channel applied. In the surveillance system managed by Cam Viewer 3 Pro, each camera has its own settings for recording, event, trigger, codec, resolution and quality. All the videos in the recording system are sorted by time. It supports cycle recording to rewrite the oldest video in the system and make the recording system work more efficiently.

Cam Viewer 3 Pro supports remote live view with up to 9 channels for each manager monitoring through any internet browser. It enables up to 5 monitors for live view operation simultaneously. The E-Map function supported different locations and supports more Hotlines for event notifications which would be helpful to find the alarm event faster and easier. The monitors also can get better video image quality in image processing.
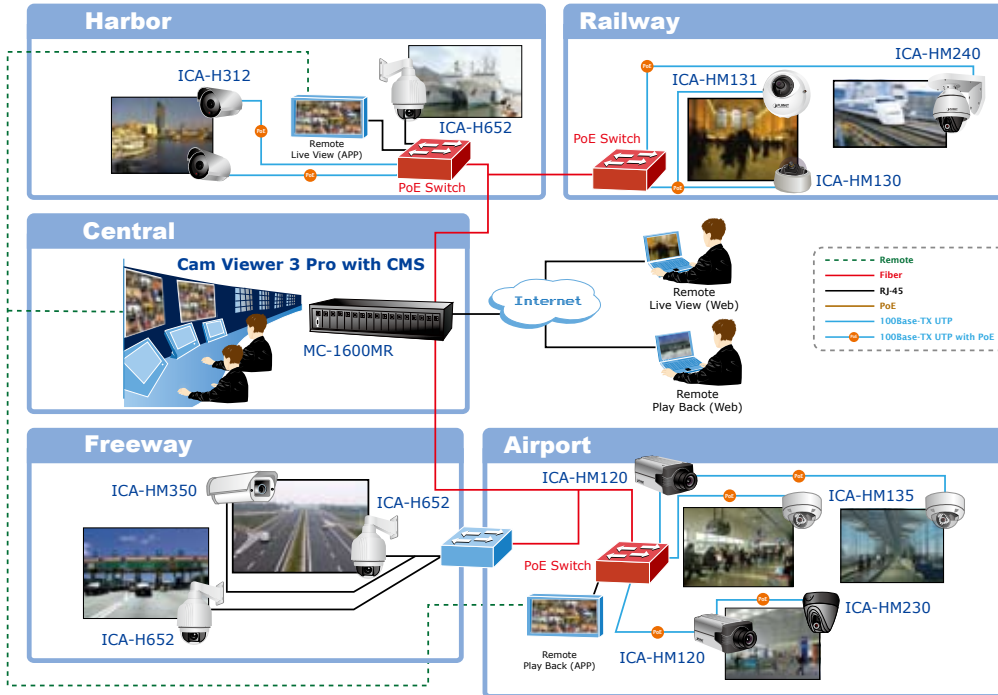

PLAENT Cam Viewer 3 Pro central management software performs a more reliable and stronger video surveillance system. Not only being a standalone management software, Cam Viewer 3 Pro can also co-work with PLANET series software to build up a complete surveillance system. For example, a Central Management System (CMS) allows user to handle the entire surveillance system in one console. With Central Management System application, you can set up a real surveillance management system instead of just a monitoring and report system.

KEY FEATURES

- Multiple cameras support up to 4 / 8 / 16 / 36 / 64 cameras
- Up to 9 channels multi-view playback simultaneously
- Supports up to 5 monitors for live operating
- Unlimited layer E-Map integrated with Google Map
- Real-time / playback video with high quality at 30 / 25 FPS
- Supports Mega-Pixel resolution from major brand IP cameras
- Flexible video screen assignment and user level access control
- Infinitely flexible record by continuous, schedule, intelligent detection of object or device trigger
- Supports Motion detection, Object loss, Object counting, Tripwire, Camera tampering, Image enhancement and Foreign objection detection
- Multi-Language support: English, Traditional Chinese, Simplified Chinese, Japanese, Italian, Spanish, Portuguese, Germany, Danish, Czech, Polish

APPLICATIONS

Users can build up their surveillance system and apply the Cam Viewer 3 Pro to management various IP camera in different environments. Users can manage the IP surveillance system centrally and enables the monitor images be viewed remotely.
