GEPON Wi-Fi ONU

Quick Guide

12V / 1A Power Adapter

Ethernet Cable

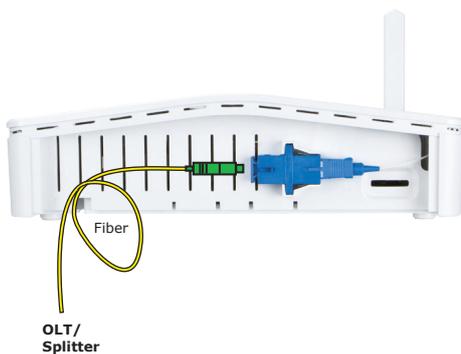

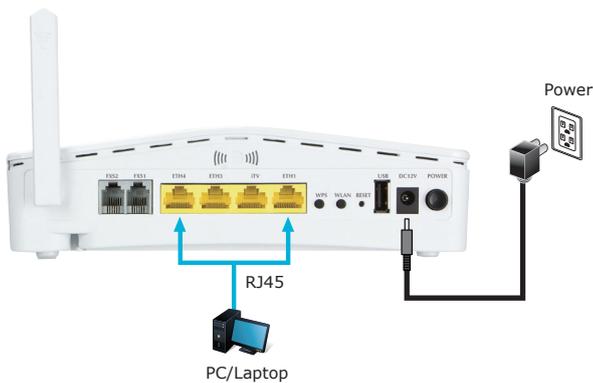

If there is any item missing or damaged, please contact the seller immediately.

2. Hardware Installation

Step 1: Connect the Power Adapter provided in the package to the EPN-402NV. The Power LED on the front panel will turn on accordingly.

Step 2: Follow the figure below to connect the network devices.

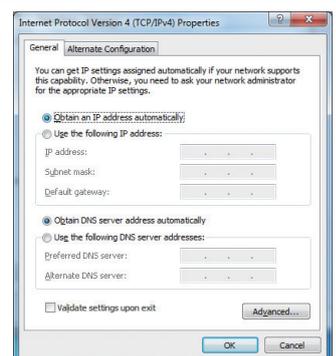

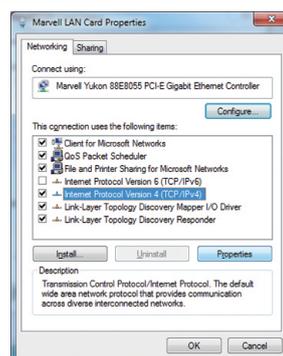

3. Network Configuration (Windows 7)

A computer with a wired Ethernet connection is required for the first-time configuration of the Wireless Router.

Steps : Set your computer to get an IP address from the Wireless Router:

1. Click **"Start"** button located in the lower-left corner of the screen.
2. Click **"Control Panel"**.
3. Double-click **"Network and Sharing Center"** icon.
4. Click **"Change Adapter Settings"**.
5. Double-click **"Local Area Connection"** icon.
6. Select **"Internet Protocol Version 4 (TCP/IPv4)"** and click **"Properties"** button.
7. Select **"Obtain an IP address automatically"** and **"Obtain DNS server address automatically"**, and then click **"OK"** button twice to save the configuration.

4. Enter into the Web Management

Default IP Address: **192.168.1.1**

Default User Name: **admin**

Default Password: **admin**

Default SSID: **EPN-402NV**

SSID2: **iTV-402NV**

Default Wireless Encryption Type: **12345678**

Step 1: The Web management allows you to access and manage the EPN-402NV easily. Launch the Web browser and enter the default IP address <http://192.168.1.1>

- 5 -

Step 2: When you enter into the Web User Interface, please enter the User Name and Password in the login window. The default User Name and Password are both **"admin"**. Then click **"Login"** button to continue.

Step 3: After you enter into the Web User Interface, please follow the indications on the screen to quickly set up the Internet connection.

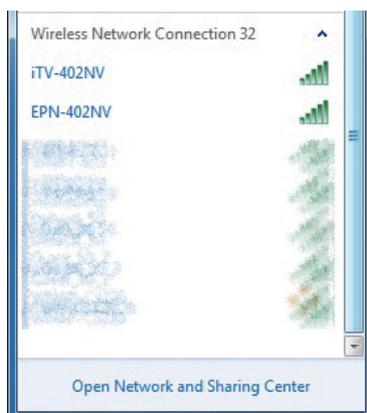

- 6 -

5. Wireless Network Connection

Step 1: Right-click on the **network icon** displayed in the system tray.

Step 2: Highlight the wireless network (SSID) to connect and click **[Connect]** button.

- 7 -

Step 3: Enter the **encryption key** of the EPN-402NV.

You have already finished the configuration of the EPN-402NV. Now you can use your iPhone, iPad, laptop, and any other Wi-Fi device to connect with it wirelessly and start surfing the Internet.

Further Information

The above steps introduce simple installations and configurations for the EPN-402NV. For further configurations of WAN, LAN, Firewall, VoIP, DMZ, and DDNS, please refer to the user manual which you can download from the website.
